1. Overview

1.1 Course aims

- Turn students' strong passive understanding of home (colloquial Jakarta-style) Indonesian into confident, accurate speaking, reading and writing.
- Give students control of both registers: everyday informal Indonesian and standard/formal Indonesian (bahasa baku), and the judgement to choose between them.
- Build a large, active vocabulary (about 1,800 core items taught explicitly, plus personal and incidental vocabulary) organised by word family and affix.
- Master the core morphology of Indonesian – especially affixation – which is the main gap for heritage learners.
- Reach CEFR B2 overall by the end of Year 2 (listening likely higher), with evidence recorded against CEFR can-do descriptors and the Indonesian BIPA competency levels.
- Deepen students' connection to Indonesian culture, history and literature, and to their own bilingual, bicultural identity.

1.2 Planning assumptions

Item	Assumption
Duration	2 school years; 40 teaching weeks per year in 4 terms of 10 weeks (8 terms in total).
Contact time	1 lesson of about 60 minutes per day, 5 days a week = 50 lessons per term, 200 per year, about 400 hours in total.
Term shape	Weeks 1–8: four 2-week thematic units. Week 9: project week. Week 10: assessment, feedback and consolidation.
Independent study	About 15 minutes of spaced-repetition review a day plus 60 minutes a week of extensive reading or listening, and one short weekly family task (about 2 hours a week in total).
Learners	Teenagers (about 13–17) with one Indonesian-speaking parent; they understand everyday home Indonesian but speak, read and write it weakly. Class size assumed to be 10–20.
Starting level	Uneven profile, typical of heritage learners: listening roughly A2+/B1 for familiar everyday topics; speaking A1–A2 (often mixed with English); reading and writing A1–A2; little control of formal register or affixes.
Setting	A school in Indonesia, so authentic input and real-world tasks (markets, transport, local community, news) are all around the students.
Materials	Teacher-curated authentic materials plus the free Badan Bahasa BIPA series Sahabatku Indonesia untuk Pelajar (BIPA 1–7) as a reference spine.

1.3 Level targets: why A2 → B2

Why start at A2 and not A1? Heritage learners already know the sound system, basic word order, a few thousand receptive words and a lot of everyday chunks. Starting at A1 would waste their advantage and bore them. Term 1 therefore consolidates A2 production quickly, while listening and reading input is pitched higher (B1) from the start.

Why aim for B2 and not C1? About 400 contact hours plus about 150 hours of structured independent study, on top of a strong receptive base and daily exposure in Indonesia, makes B2 (independent user: can discuss abstract topics, argue a view, and write clear, detailed formal texts) ambitious but realistic. C1 needs sustained academic reading and writing that goes beyond a 5-lesson-a-week school course; able students can still reach C1 in listening.

Why CEFR? It is the international reference for language levels, it has detailed can-do descriptors for teenagers' communicative tasks (updated in the 2020 Companion Volume, including mediation), and Indonesia's own BIPA

competency standards (Permendikbud No. 27 Tahun 2017, 7 levels) were explicitly adapted from CEFR. So the CEFR spine lines up with Indonesian national materials.

Indicative alignment used for planning (not an official equivalence): Terms 1–2 ≈ BIPA 2 (A2), Terms 3–4 ≈ BIPA 3 (B1), Terms 5–6 ≈ BIPA 4 (B1+), Terms 7–8 ≈ BIPA 5 (B2).

1.4 Methods and how each is used

Method	Basis	How it is used in this course
CEFR levels and can-do descriptors	Council of Europe (2001; Companion Volume 2020).	The progression spine. Each term has a CEFR target and 'can-do' statements that drive the task design, the rubrics and student self-assessment.
Communicative language teaching (CLT)	Meaning-focused interaction in realistic situations.	Information gaps, role-plays (warung, market, clinic, job interview), surveys and discussions every week; accuracy is taught in service of communication.
Task-based language teaching (TBLT)	Willis (1996) task cycle; Ellis (2003).	Every Wednesday runs a pre-task → task → planning → report → language-focus cycle. Week 9 of every term is a larger project (e.g. class news bulletin, debate tournament, cultural evening).
Comprehensible input	Krashen's input hypothesis (i+1).	Monday input lessons use stories, songs, video, news and texts slightly above current level. Because heritage students understand more than they can say, input is pitched about half a level above the output target. Themes are recycled over two weeks ('narrow input') so that vocabulary repeats naturally.
Heritage-learner pedagogy	Valdés (2001); Polinsky & Kagan (2007).	Start from what students already know (home Indonesian), make it explicit, then bridge it to standard forms: colloquial → baku mapping tables, register-switch rewriting, and literacy through genres they meet in real life. The home variety is valued, not 'corrected away'. Weekly family tasks (e.g. interview a parent) turn home into a source of input and output. Targets typical gaps: affixes, formal pronouns and address, spelling (EYD), and extended talk.
Explicit grammar: focus on form	Long (1991); noticing.	Tuesday lessons draw grammar from Monday's text (noticing), explain it briefly and explicitly, then move from controlled to freer practice. There is a planned sequence for affixation (ber-, meN-, di-, ter-, -kan, -i, ke-...-an, peN-, peN-...-an, per-...-an, memper-), reduplication, aspect markers, classifiers and register.
Spaced repetition and systematic vocabulary	Anki; Nation's 'four strands'.	Each term's vocabulary list is issued as an Anki deck (recognition, production, cloze-sentence and audio cards). About 5–8 new list cards per school day plus personal words from reading. Time is balanced across Nation's four strands: meaning-focused input, meaning-focused output, language-focused learning and fluency development.
Register and sociolinguistic awareness	Formal vs informal Indonesian.	Pronoun and address systems (saya/aku/gue; Anda/kamu/lu; Bapak/Ibu/Kak) are taught from week 1. Speaking tasks state the required register; written tasks use baku unless the genre is informal (chat, social media).

1.5 Weekly lesson rhythm

Day	Focus	What happens
Monday	Input and vocabulary	Comprehensible input on the unit theme (text, video, song, story); new words met in context; word-family mapping; new SRS cards released.
Tuesday	Grammar (focus on form)	Noticing the target structure in Monday's input; short explicit explanation (usually an affix or aspect/register point); controlled → freer practice; mini-quizz on the exit ticket.
Wednesday	Speaking task (TBLT)	Task cycle: pre-task, pair or group task, planning, report to class, feedback and language focus. The register is set by the task.
Thursday	Reading and writing	Authentic text of the target genre; genre and structure analysis; guided writing; colloquial → baku rewriting; peer editing using EYD checklists.

Day	Focus	What happens
Friday	Review and assessment	Vocabulary and grammar quiz (15 min); fluency games; extensive reading/listening time; reflection against can-do statements; weekend family task set.

A typical 60-minute lesson: warm-up and SRS check (5–10 min) → main input or task (35–40 min) → consolidation and error focus (10 min) → exit ticket (5 min).

Each 10-week term follows the same shape: four 2-week units (weeks 1–8), a project week (week 9) in which students use the term's language in an extended task, and an assessment and consolidation week (week 10).

1.6 Vocabulary approach

- About 1,800 core words and phrases are listed in Section 3, rising from about 205 in Term 1 to about 250 in Term 8 (Year 1 ≈ 850, Year 2 ≈ 965). The lists are a minimum: students also add personal words from their reading and from home.
- Words are grouped by theme and taught as families (e.g. makan → makanan, memakan, dimakan), so every affix lesson also grows vocabulary.
- Colloquial items are marked [coll.] with the standard form after '→'. Heritage students usually know the colloquial form; the goal is to add the standard one, not to replace the home one.
- Spelling follows EYD Edition V and KBBI (e.g. Idulfitri, salat, kaus, antre, karier, apotek, utang).

1.7 Register policy: bridge, don't ban

Colloquial Indonesian is the students' strength and the language of their homes; it is used as the starting point, not treated as an error. Every task states its register. In speaking tasks with peers, natural informal Indonesian is welcome; in presentations, interviews and all formal writing, standard Indonesian (bahasa baku) is required and assessed. Appendix A sets out the pronoun system and the main colloquial Jakarta features, with their standard equivalents.

2. Term-by-term plan

Each term lists its CEFR target, themes, grammar, speaking and writing tasks, authentic materials and assessment, followed by a week-by-week outline. Grammar is cumulative: earlier points are recycled in later terms.

4. Assessment plan and CEFR checkpoints

4.1 Principles

- Diagnose first: in Term 1, week 1, each student gets a skills profile (listening, speaking, reading, writing, register awareness), because heritage profiles are uneven.
- Assess what is taught: every summative task mirrors the term's project and genre, and is marked with the same analytic rubric.
- Assess both registers: tasks specify formal or informal, and 'register control' is a separate criterion.
- Make progress visible: students keep a portfolio (writing drafts, audio/video recordings, SRS statistics) and self-assess against can-do statements each term, following the European Language Portfolio model.
- Report by skill: termly reports give a CEFR band for each of the four skills, not just one overall grade.

4.2 Weighting (each term)

Component	Element	Weight
Continuous (40%)	Weekly Friday quizzes (vocabulary and grammar)	15%
	Spaced-repetition completion and reading/listening log	10%
	Classwork, speaking tasks and family tasks	15%
Summative (60%)	End-of-term speaking task (interview, presentation, debate)	20%
	End-of-term writing task (genre of the term)	20%
	Listening and reading test	20%

4.3 Analytic rubric (4 bands: below target / approaching / at target / above target)

Criterion	What is assessed
Task fulfilment	Covers the task, audience and purpose; content is relevant and developed.
Range	Breadth of vocabulary (including term lists) and variety of structures.
Accuracy	Grammar and especially affixation, word order and EYD spelling.
Register control	Chooses and keeps the right register; formal texts avoid colloquial forms; informal tasks sound natural.
Fluency and coherence	Flow, connectors, paragraphing, turn-taking.
Pronunciation (speaking)	Intelligibility, stress and intonation.

4.4 CEFR checkpoints

Term	CEFR	Speaking / interaction can-do	Writing can-do
T1	A2	Can describe family, school and routine in simple connected sentences; can switch between saya/aku and Anda/kamu appropriately.	Can write a short personal profile with basic connectors and correct spelling of common words.
T2	A2+	Can handle everyday transactions (ordering, bargaining, prices) and give simple reasons and comparisons.	Can write a clear recipe, review or invitation in the right register.
T3	B1	Can narrate experiences and give opinions on music, film and sport with some detail.	Can write a structured review or narrative using di-passives and connectors.
T4	B1	Can give a prepared presentation and answer questions; can report what others said.	Can write a 300-word description or narrative and a formal enquiry email.
T5	B1+	Can summarise and discuss news on familiar topics; can interview someone and follow up.	Can write a news report and a formal letter using nominalisation and formal connectors.

Term	CEFR	Speaking / interaction can-do	Writing can-do
T6	B1+/B2	Can argue a position, rebut points and negotiate; is largely fluent on familiar issues.	Can write a coherent argumentative essay with conditionals, concession and hedging.
T7	B2	Can take part in a formal interview and present research clearly with some spontaneity.	Can write a CV, cover letter and short report in accurate formal Indonesian.
T8	B2	Can discuss abstract, cultural and literary topics fluently and adapt register to audience.	Can write a clear, detailed literary or historical text with good control of affixation.

4.5 Major checkpoints and external benchmarks

- **End of Year 1 (Term 4, week 10):** B1 checkpoint in all four skills, including an oral presentation with questions and a 300-word text. Students below B1 in writing get targeted literacy support in Term 5.
- **Mid-Year 2 (Term 6, week 10):** B1+ checkpoint with a debate and an argumentative essay.
- **End of course (Term 8, week 10):** B2 exit examination: listening and reading papers using authentic texts, an extended formal writing task, and a 15-minute oral (presentation plus discussion).
- **Optional external benchmark:** UKBI Adaptif from Badan Bahasa (sections: listening, responding to grammar rules, reading, writing, speaking; 7 grades from Terbatas to Istimewa) for able Year 2 students who want an official certificate.

4.6 Differentiation

- Stretch tasks and extra authentic reading for students whose receptive level is well above the class target.
- Literacy clinics (phonics–spelling links, EYD) for students who speak well but write weakly.
- Mixed-ability pairing: stronger speakers help with fluency; stronger writers help with accuracy and formal register.
- Personalised Anki cards for recurring individual errors, especially affix choice.
